

Build big with Azure AI

MAQ Software, in partnership with Microsoft, is committed to helping customers adopt AI. Learn more about Azure below.

Azure AI services

Azure AI Language

Azure AI Vision

Azure AI Speech

Azure AI Decision

Azure OpenAI

Azure AI Cognitive Search

Azure AI Form Recognizer

Azure AI Bot Service

Azure AI Video Analyzer

Azure AI Metrics Advisor

Azure AI Immersive Reader

Azure Machine Learning platform

Machine Learning

Your go-to platform for experimenting with large language models, offering:

- Streamlined design, evaluation, and deployment of prompts.
- Flexibility in fine-tuning, with options for either OpenAI or open-source software models.
- Robust AI infrastructure backed by high-performance GPUs.

Ready to get started?

When implementing a user-facing AI system, you'll navigate three crucial stages. Each has its own benchmarks for maximizing impact and safeguarding your business, customers, and community.

Responsible assessment

Identify high-priority areas within your AI development and how you will track the process, review, and secure approvals.

Responsible development

From data collection to supporting fairness in performance and representation, build your AI systems responsibly.

Responsible deployment

As you deploy, it's critical to empower the right people and reinforce common practices to fortify responsible AI use, operationalization, and performance metrics.
